Seminar on “Yoga for Health and its benefits for Students” was held at our Dhanalakshmi Srinivasan College of Engineering and Technology, Mamallapuram on 24th September 2023 for the final year students of Academic Year 2023-2024.

The Guest of the day Anantharaman P – from VINIEYOGA HEALING CENTE has explored the simple yoga pose that’s trending on social media may help reduce swelling, varicose veins and wrinkles, and boost circulation, memory and eyesight ‘This is the ideal posture to adopt when we are feeling stressed or overworked,’ one yoga teacher says. Try it before you go to bed for a great sleep

In a stress-filled world, the ancient Indian practice of yoga provides many solutions and answers, and is popular around the globe.

Viparita karani, or the “Legs Up the Wall” pose, has been trending on social media, with TikTok influencers including Lex Nicoleta and Christina Najjar (“Tinx”) having embraced the pose.

This is a variation of a restorative yoga pose in which the body, hips and head lie flat while the legs are inverted at almost 90 degrees. It relaxes the abdomen, legs and lower back, especially after doing standing yoga poses.

Viparita means inverted and karani means in action. Yoga has many poses, or asanas, known as inversions in which the legs are higher than the heart. These include sarvangasana (shoulder stand), sirsasana (headstand), and adho mukha vrksasana (handstand).

Legs Up the Wall is an anti-ageing pose that can help alleviate wrinkles and fine lines. People who cannot do shoulder stands can do this without straining their neck or head.

Practitioners claim the pose stimulates the higher chakras – energy centres – such as the third eye (ajna) in the middle of the forehead and crown (sahasrara) on top of the head, boosting spiritual energy.

On its Health Essentials website, the Cleveland Clinic academic medical centre based in Ohio in the United States describes the benefits of the pose: it can help recirculate fluid that has built up in your legs to reduce swelling; improve circulation; relieve congestion and water retention; address varicose veins; and avoid blood pooling while helping with lymphatic drainage.

Like most yoga poses, it also promotes relaxation, the Cleveland Clinic says, adding it may help to manage stress and anxiety as well as insomnia and jet lag.

Gail Boorstein Grossman, a popular yoga teacher based in New York, considers viparita karani one of her favourite poses to practise and to teach.

“Everyone can benefit from the gentle inversion. It has great benefits for calming the nervous system as well as the physical benefits of assisting the lymph system,” which is part of the immune system, she says. It provides a great post-workout stretch for athletes and is helpful for others in need of recovery.

“I highly recommend people integrate this into their daily lives. It’s truly like taking a nap if you spend 10 to 15 minutes in the pose.”

Although it is usually done at the end of a yoga session before the final shavasana or relaxation pose, it can also be practised independently. At the end of a long, tiring day, it can energise you and lift your mood.

“It grounds me instantly and makes me relaxed. It’s so simple and doesn’t require any warm-up. I also have varicose veins, and this has improved that a lot. It also makes me mentally agile, ready to take on a new day.”

Anantharaman P, a yoga teacher based in Chennai, India, also favours this pose.

“This inverted balance exercise was created to bring harmony and union of opposites ... through the use of gravity. Besides its physical effects, it is also good for the mind and brain,” he says.

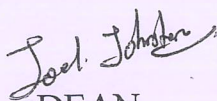

The targeted audience is the final year students of all the departments. A total of 432 participants were attended in this seminar.
